

Ever Vigilant

Order Monitor

Daily order tracking

Alerts for new postings

Fully automated

Ensure a problem-free close

Available in TitlePoint

Offer your client the assurance of a problem-free close

When you activate Order Monitor on any open order in TitlePoint®, you'll receive a daily report that details recording and posting activity for that order, with references to specific documents. In turn, you can alert your clients about transactions that indicate potential fraud, or could jeopardize their closing.

Order Monitor's simple, automated design allows you to activate and de-activate tracking for any open order by clicking on a link on the Order Home Page. We do the rest.

Spot events before they become problems and guard against surprises at closing.
