

ProSight

Results in less time

It's easy to be at your best when you support your customers.

Available in TitlePoint[®], ProSight generates a detailed financial profile of a property using title-grade data compiled from Property Insight's title plant and tax databases. Our advanced plant architecture ensures that the correct subject property is the focus of the search.

Fast and easy searching

ProSight's intelligent search functionality streamlines the search process to produce refined results in less time. Include conveyances, encumbrances, liens and judgments and current tax obligations (where available) in your search. You can choose which items to include in your search prior to launch.

Add the finishing touches

ProSight provides an advanced editing toolkit that allows you to edit search results following your initial query.

Using text and check boxes and right-click editing features, you can add names, tag records

and documents and enter freeform notes for your customer that will display in the final report.

View any document in the search results listing by clicking on the document number to open an image viewer. Key fields contained in documents, such as legal descriptions and vesting clauses, can be converted to text form and copied and pasted to other documents.

Make ProSight your own

You can customize ProSight reports with your company's header and footer, including your logo. Keep track of reports you produce by customer and monitor the success of your marketing and sales efforts.

ProSight is available in the following markets:

Arizona

California

Illinois

Indiana

Washington

Provide your customers a detailed profile that includes

- Current plant postings
- Full tax information (where available)
- Document images
- Starter records (for qualified users)
- Conveyances
- Open encumbrances
- Liens and judgments
- Bankruptcies
- Divorce decrees

ProSight, from Property Insight

We stand on a proven track record of innovation and reliability in title search and order management technology.

We offer attentive, professional service delivered through our experienced account management and client services teams.

Plant operations teams make every effort to ensure the quality, consistency and currentness of title plant data.
